

FURTHER INFORMATION

TEACHER OF IT PART TIME – PERMANENT

Students:

IT BTEC was introduced in the college in 2012 and A level Computer Science in the college in 2018 and both have become popular subjects. We currently have just over 70 taking IT and nearly 100 students taking Computer Science.

Staff:

Currently Computer Science sits within the Physics department, and we have a separate department for IT BTEC. We are creating a new Computer Science and IT department for September and have appointed a new Head of Department. We also have a course coordinator for Computer Science A level. This role provides an exciting opportunity for someone to be part of a new department in the college. Staff in the department will teach on either the IT BTEC course, A level Computer Science, or both, depending on their skills and experience.

Course and Exam Board:

We are currently teaching the Edexcel Pearson BTEC IT Extended Certificate 2016 course (due to end 2025 before the course becomes the new AAQ version). For any candidates who might be also interested in teaching Computer Science, we teach the AQA A Level Computer Science specification. The programming language currently used is C#, with Winforms used as a GUI. The programming teaching is front loaded, with OOP taught in the first year which enables students to begin working on their coursework projects at the end of January in the first year. Robotics has also been part of the college's Complementary Studies programme.

Department and Facilities:

Teachers here at Esher work closely together, collaborating on all aspects of the courses they teach. We also have links with other sixth form colleges in the area and are part of a consortium of colleges called S7. Staff have a college laptop which can also be used as a tablet. We have dedicated classrooms for these courses which are all equipped with PCs and projectors/TV screens. The classrooms are well situated in the centre of the college, close to Maths and the Science departments. The department share teaching resources freely and have access to a variety of other resources, including Exam Pro, textbooks by both Bond and Heathcote and class sets of Arduinos and Raspberry Pi computers. All teachers contribute to student support clinics. Departments are supported by an excellent IT Services Team.

Additional Information:

We currently have the opportunity to consider which AAQ we will run, for first teaching in 2025, in order to support students who prefer a more vocational approach to learning and want to focus on the user side of computing. The successful applicant will be joining us at a critical moment in developing our Computing and IT provision. They will work with the other staff in the department to determine the place of the subject in the college's curriculum as broadly as possible, with resulting effects on the development of students' plans for their working lives and the equipping of our society with crucial expertise for the present and future.

College Hours:

College teaching periods start at 8.55 am and end at 4.15 pm. Each teaching period is 65 minutes. Core staff hours are between 10am and 3pm, which provides some flexibility when not teaching the first or last teaching period of a day.

Salary: Salary will be up to £48,355 per annum, inclusive of fringe area allowance, depending on experience (pro rata).

Closing Date: **9am, Friday 3rd May 2024**

Interviews: **Thursday 9th May 2024**
